## WehoManholes *Lightweight High Density Polyethylene Manholes*

KWH Pipe is the manufacturer of WehoManholes, a lightweight high density polyethylene manhole system. WehoManholes are available in sizes ranging from 36" (910mm) to 120" (3050mm) ID. Our product is flexible and extensive, enabling engineers to meet requirements of the most demanding projects. All manholes manufactured by KWH Pipe conform to ASTM F1759 and are accompanied by shop drawings. All WehoManholes are quality assurance inspected and air tested before shipment.

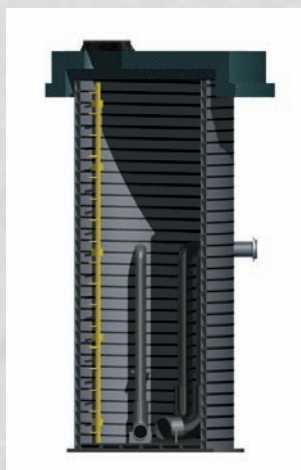

KWH Pipe ensures the stakeholder will receive professional sales and engineering support from our personnel during the design phase as well as after sales support. KWH Pipe also offers manhole design assistance to help stakeholders create a custom solution catered toward their requirements.

### WehoManholes are ideal for:

- Leachate extraction chambers/leachate collection wells
- Decant structures
- Groundwater control shafts
- Leak detection manholes
- Inspection chambers and industrial/municipal manhole applications
- Wet Wells

3D Concept of H2O Loading Cap

H2O Loading Cap

## WehoManhole Applications:

- Landfills
- Mining
- Industrial
- Sanitary Sewers
- Hydroelectric
- Municipal
- Storm drains
- WehoTank inspection chambers

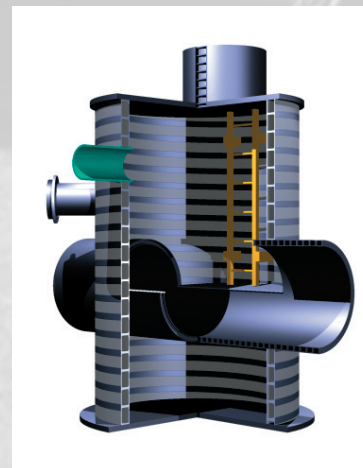

## Advantages of WehoManholes vs Traditional Manholes

- Long service life
- Corrosion Resistant
- Superior abrasion resistance
- Immune to normal loads of hydrogen sulfide and sulphuric acid
- Leak proof structures
- Prefabricated benching for faster installations
- Lightweight for easier installation and reduced project costs
- Economical with short lead times
- Professional sales and engineering support
- Suitable for burial depths up to 50'
- Custom fabricated manholes are available

## Manhole Custom Options:

- Multiple inlet configurations
- Channeling
- Flat bottom
- Benched bottom
- FRP ladders
- FRP/Aluminum landing platforms
- Hinged lid
- Lockable lid
